Brief Description of Proposed Innovation

What is your initial idea for the innovation, its function and use?

Describe the market need/gap or opportunity identified to be met by the proposed innovation.

What is the estimated level of readiness of the innovation? (Use the Technology Readiness Level Scale below)

What has been done so far to advance the development of the innovation and what additional resources do you need to continue, including specialist skills and knowledge; and for what period of time (funding is available for maximum of six months)?

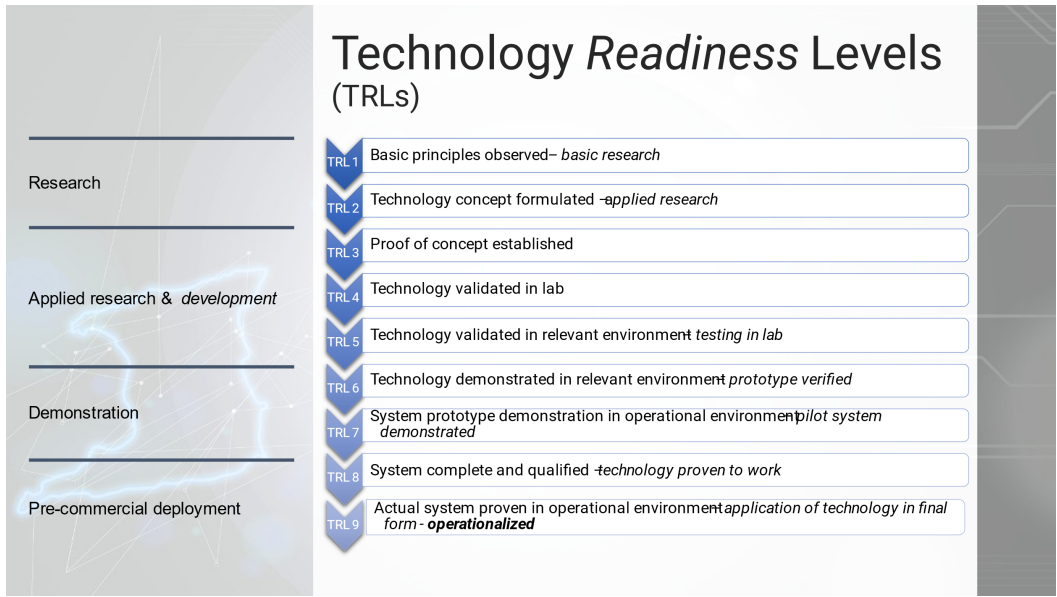

Maximum 250 words
